Marine Pro 400 Series
RP 420E Remote Panel

At a glance

- IACS approved
- Cyber secure
- Self-configuring
- Touchscreen
- Rugged glass-helm design
- Twin engine control
- Hybrid/electric ready

Why customers choose the RP 420E

- Easy, low-risk install
- No programming needed
- Works with all Marine Pro 200 and 400 Series engine controllers
- Multilingual – crew-friendly and global
- Accurate data visualisation for safe decisions
- Flexibility to monitor and control both propulsion and gensets on one screen

Example of use in a typical system

The RP 420E is a cyber secure IACS-approved remote touchscreen panel for twin-engine configurations with 200 Series or 400 Series of Marine Pro engine controllers (DCUs). It has a high resolution, sunlight capable screen and is fully weather protected both front (IP66) and rear (IP56) with weather tight connectors.

The RP 420E can monitor and control one or two Marine Pro 200 or 400 Series engine controllers. The panel is also truly self-configuring. Any changes in any engine controller's configuration are immediately reflected into the RP 420E without any operator actions.

If more than two DCUs are in use or a larger screen is needed, the RP 480i Remote Panel with it's 12" touchscreen can control up to eight Marine Pro 200 or 400 Series engine controllers.

Ordering info

Item	Part number
RP 420E Remote Panel	1006484
DCU 210E Engine Controller	1006475
DCU 410E Engine Controller	1006445
